

Authorization to Carry Out the Annual Inspection on FVG GmbH & Co. KG Vehicles in Accordance with VDI 2700 Sheets 8.1 and 8.2

Dear Sir or Madam,

Upon receiving a load-securing certificate for your vehicle, the conformity must be checked annually by a qualified person in accordance with VDI 2700 Sheets 8.1 and 8.2.

To make this process easier for you, we will be offering training on the topic “Carrying Out the Annual Inspection on FVG GmbH & Co. KG Vehicles – in accordance with VDI 2700 Sheets 8.1 and 8.2” starting in 2026.

The prerequisite for the training is that you already have some knowledge in the field of load securing in accordance with VDI 2700 Sheet 8. You must be able to provide written proof of this. From now on, we will refer to this part as the “General Module”.

Our own part will from now on be called the “FVG Module (manufacturer-specific)”.

Only when both the “General Module” and the “FVG Module” are proven will you receive confirmation from FVG GmbH & Co. KG regarding the authorization for FVG vehicles.

For further information about the training, please refer to our supplementary sheet.

“Serviceability in the Area of Vehicle Transporters and their Load Securing”.
